

# CSBA Sample BP 3511.1

## Board Policy

### Business and Non Instructional Operations

BP 3511.1(a)

#### INTEGRATED WASTE MANAGEMENT

Note: The following **optional** policy may be revised to reflect district practice. Pursuant to Public Resources Code 42630, schools are encouraged to assist cities and counties in meeting the solid waste diversion goals set by Public Resources Code 41780. In addition, pursuant to Public Resources Code 42649.2, as added by AB 341 (Ch. 476, Statutes of 2011), businesses, including schools, that generate more than four cubic yards of solid waste per week are required to arrange for recycling services in accordance with law. Useful resources such as specific waste management strategies, available funding sources, and other publications, including resources for developing and implementing integrated education programs that link instruction on integrated waste management and environmental concepts with student action projects at school sites, may be obtained from the California Department of Resources Recycling and Recovery (CalRecycle).

The Governing Board believes that the conservation of natural resources and the protection of the environment are connected to the district's educational mission and are essential to the health and well-being of the community. The Superintendent or designee shall develop and/or implement a cost-effective, integrated waste management program that incorporates the principles of green school operations.

The district's program shall include strategies designed to help the district reduce solid and hazardous waste generation, improve efficiency in its use of natural resources, and minimize the impact of such use on the environment. The program shall address all areas of the district's operations, including, but not limited to, procurement, resource utilization, and facilities management practices.

xThe Superintendent or designee may collaborate with city, county, and state agencies and other public or private agencies in developing and implementing the district's integrated waste management program.

Note: CalRecycle provides grants and related information to eligible schools for developing and implementing integrated waste management programs. For more information, see CalRecycle's website.

The Superintendent or designee shall make every effort to identify funding opportunities for the district's integrated waste management program including applying for available grants or other cost-reduction incentives.

To the extent that funding permits, the Superintendent or designee shall provide appropriate educational and training opportunities to students and staff regarding the benefits and methods of conserving natural resources and protecting the environment.

The Superintendent or designee shall regularly monitor all aspects of the district's integrated waste management program and shall provide an update to the Board on its effectiveness as necessary.
